REC\_DS using C\_Week 2\_COD\_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 0

Section 1: Coding

#### 1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

### **Output Format**

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

## Sample Test Case

```
Input: a b c -
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
Char item;
  struct Node* next;
  struct Node* prev;
// You are using GCC
struct Node* tail;
void insertAtEnd(struct Node** head, char item) {
  struct Node* newnode=(struct Node*)malloc(sizeof(struct Node));
  newnode->item=item;
  newnode->next=NULL;
  newnode->prev=NULL;
  if(*head==NULL){
   *head=tail=newnode;
  }else{
```

```
24,150,1055
        tail->next=newnode;
        newnode->prev=tail;
        tail=newnode;
    void displayForward(struct Node* head) {
      struct Node*temp=head;
      while(temp!=NULL){
        printf("%c ",temp->item);
        temp=temp->next;
                                                                           247507055
      printf("\n");
      //type your code here
    void displayBackward(struct Node* tail)
      struct Node* temp=tail;
      while(temp!=NULL){
        printf("%c ",temp->item);
        temp=temp->prev;
//type your code here
    void freePlaylist(struct Node* head)
      struct Node*temp=head;
      while(head!=NULL){
        Node* nextnode=temp->next;
        free(temp);
        temp=nextnode;
                                                                           24/50/055
      head=NULL;
      tail=NULL;
      //type your code here
```

```
24,150,1055
                                                                                  24,150,1055
    int main() {
   struct Node* playlist = NULL;
      char item;
      while (1) {
         scanf(" %c", &item);
        if (item == '-') {
           break;
        insertAtEnd(&playlist, item);
      }
      struct Node* tail = playlist;
                                                                                  24,150,1055
      while (tail->next != NULL) {
       tail = tail->next;
      printf("Forward Playlist: ");
      displayForward(playlist);
      printf("Backward Playlist: ");
      displayBackward(tail);
      freePlaylist(playlist);
                                                      24,150,1055
      return 0;
Status : Wrong
                                                                           Marks : 0/10
